A5809 Tall drawer frame

SB TOOL-LESS

Repon SB tool-less blade server slide adopted the original and patented tool-less mechanism for next generation server mounting. Inspired by the jaw of stag beetle, we named our products as "SB tool-less ". Its slick and streamlined design integrated several parts and turned them into one piece stag alike clip. Unlike traditional server mounting which requires lots of manpower, SB tool-less requires only one person to mount the server, which saves a lot in time and labor.

WOODEN DRAWER

Wooden drawer concealed slides as its name suggests are located underneath the drawer so that hardware part won't be exposed to users. Repon incorporated battery based LED stick into the concealed slides to allow users better locate items in each corner of the drawer, and also enhance the aesthetic of the furniture. Since the LED stick is powered by battery, it actually saves lots of time and hassle from installation and wiring. The wooden drawer with LED stick does help when the lighting is not sufficient.

The 6th G SOFT CLOSE

The innovative dampening design of soft close drawer slides eliminates the drawback of traditional hydraulic and pneumatic dampers, which the grease or oil seal will fail after long turn use (result in damper failure), and adopting simple and cost effective design. The soft close slide' s light movement, highly stable profile design and special shock absorbing mechanism differentiate Repon soft close from traditional drawer slides. End-users can open and close the drawer with an ease, which adds more value to the cabinet.

TAIWAN- M34971 | JAPAN- 3153765 | USA- 12/320846

DOUBLE WALL SYSTEM FOR WARDROBE

The biggest feature from the new system to differentiate it from the rest of double wall family is the one-piece metal drawer frame. The advantage of it is to eliminate the use of gallery rail, which save cost and time. The other feature is multi connecting stages. It facilitates the drawer installation by allowing more forgiveness. Moreover, incorporating "Dry damper " extends the longevity of drawer. The new double wall system for wardrobe reduces the use of wood, and the purpose of it is to sustain the environment.

6 PATENTS:

TAIWAN- M34971 | JAPAN- 3153765 | USA- 12/320846

EASY DOWN

NJ27 series is Repon' s brand new “Real-time easy down flipper door slides “ (a.k.a. easy down), and also a new approach of storage to users. Repon' s real time easy down is developed for upper case (wall case) of home environment. TV cabinets in living room and upper filing cabinets may adopt such design approach.

When case is open, and front door panel will be guided to rest on top the case. The user does not need to hold the door panel open with his or her hands, and can easily access the items stored inside the case without any concerns of injury.

1 PATENTS:

TAIWAN- M509256

R CUBE

R Cube aims to elevate the application and value of the drawer, and change your perception regarding a drawer from now on.

The drawer will not just serve as the storage but as part of the decoration which shows your taste, style and status.

EASY DOWN

The system is set to support the door loading around 12kgs (25lbs). For heavier door loading, thanks to the flat mount design, there is no need to use different grade of damper. All you need to do is purchase additional slides till the door drop motion meets your requirement.
